POLICY

New

Approved by: Board of Directors

W-304 Upsizing existing water connections/meters

This policy applies when a current $\frac{3}{4}$ inch connection is increased to 1-inch. This policy does not apply to new water connections.

1. Properties with existing $\frac{3}{4}$ inch connections/meters can be upsized.

Property owners may apply to have their active water connections increased to 1-inch to accommodate fire sprinkler systems.

2. Installation is performed by PCSD staff

Only authorized personnel may work on the PCSD water system and connections. Scheduling is at the discretion of the district.

3. The cost of upsizing is the responsibility of the property owner.

The cost for labor and materials to change an active $\frac{3}{4}$ inch meter to 1-inch connection and meter is the responsibility of the property owner.

- If an existing cabin does not yet have a $\frac{3}{4}$ inch meter installed, the property owner may request a 1-inch connection and meter at no additional cost.

4. Payment

The district will bill the property owner directly for labor and material costs. Payment is due within 30 days of receipt.
